I want to find Joe Rogan interview with AI venture capitalist.

Workflow

Joe Rogan Interview with AI Venture Capitalist

Marc Andreessen, a prominent venture capitalist known for his investments and views on technology and artificial intelligence, has appeared multiple times on The Joe Rogan Experience. His most recent appearance is notable for discussing not only his political views but also his insights into AI and its impact on society and the future of technology ¹. In this episode, Andreessen shares his perspectives as a venture capitalist deeply involved in the AI sector, making him a key figure for anyone interested in the intersection of AI and venture capital.

If you are looking for a Joe Rogan interview specifically with an AI-focused venture capitalist, Marc Andreessen's episodes are the most relevant and widely discussed. He covers topics ranging from the economic and societal implications of AI to the future of warfare and technology investment.

Additional Notes

- There are also AI-generated podcasts that simulate Joe Rogan interviewing various AI experts and venture capitalists, but these are not real interviews and are created using AI language models ².
- If you are interested in other AI-related guests on Joe Rogan, there is a category listing of AI guests on the JRE Library ³.

Summary:

For a real interview between Joe Rogan and an AI venture capitalist, check out the episodes featuring Marc Andreessen, where he discusses AI, technology, and venture capital in depth.

Black George Washington? Google shows pitfalls of ‘woke’ AI

Google’s chief executive, Sundar Pichai, said it was “completely unacceptable” that his company’s AI tool inserted unprompted diversity into requests for historical images.

Black Nazis. An Asian man among America’s founding fathers. An American Indian woman serving in the US Senate circa 1800.

Users querying Google’s new AI image generator, Gemini, were greeted with these depictions of strange and ahistorical diversity in February in response to prompts they expected to generate more realistic results.

Localized AI

Budget/Cheaply (~\$500-800)

- **CPU:** AMD Ryzen 5 5600 or Intel i5-12400
- **GPU:** RTX 4060 8GB or RTX 3060 12GB (the 12GB is better for larger models)
- **RAM:** 16GB DDR4
- **Storage:** 500GB NVMe SSD
- **Good for:** 7B parameter models, basic coding assistants, simple text generation

Localized AI

Reasonably Powerful (~\$1200-2000)

- **CPU:** AMD Ryzen 7 5800X or Intel i7-12700
- **GPU:** RTX 4070 12GB or RTX 4060 Ti 16GB
- **RAM:** 32GB DDR4/DDR5
- **Storage:** 1TB NVMe SSD
- **Good for:** 13B parameter models, more complex tasks, faster inference, some fine-tuning

Localized AI

Very Powerful (~\$2500-4000+)

- **CPU:** AMD Ryzen 9 7900X or Intel i9-13900K
- **GPU:** RTX 4080/4090 or dual RTX 4070s
- **RAM:** 64GB+ DDR5
- **Storage:** 2TB+ NVMe SSD
- **Good for:** 30B+ parameter models, fast inference, local fine-tuning, multiple simultaneous models

Localized AI

Budget Mac Options

- **Mac Mini M2 (16GB RAM) - ~\$800-900**
 - Good for: 7B models, basic tasks
 - Limited by 16GB unified memory
- **MacBook Air M2 (16GB RAM) - ~\$1200**
 - Similar performance to Mini but portable
 - Thermal throttling under sustained loads

Localized AI

Reasonably Good Mac System

- **Mac Mini M4 Pro (32GB RAM)** - ~\$1500-1600
 - Solid for 13B models
 - Better sustained performance than base M2
- **MacBook Pro 14" M4 (18GB RAM)** - ~\$2000
 - Good balance of performance and portability
 - Can handle most local AI tasks well

Localized AI

Very Good Mac System

- **Mac Studio M4 Ultra (64GB+ RAM) - ~\$4000+**
 - Excellent for large models (30B+)
 - 24-core GPU, massive unified memory bandwidth
- **MacBook Pro 16" M4 Max (64GB+ RAM) - ~\$4500+**
 - Most capable portable option
 - 40-core GPU, great for on-the-go AI work
- **Mac Pro M4 Ultra (128GB+ RAM) - ~\$7000+**
 - Overkill for most users but handles anything

Localized AI

Install Ollama

Mac:

bash

brew [install](#) ollama

Or download from <https://ollama.ai>

Windows: Download the installer from <https://ollama.ai>

Localized AI

Start Ollama and Pull a Model with a Mac

```
bash
```

```
# Start Ollama service
```

```
ollama serve
```

```
# In a new terminal, pull a model (examples)
```

```
ollama run llama2 # 7B model (~4GB)
```

```
ollama pull mistral # 7B model (~4GB)
```

Localized AI

Running ollama with a wonderful interface, that does Rag, voice to text etc.

<https://docs.openwebui.com/>

Localized AI

Install Cloudflare Tunnel

First, install the cloudflared CLI:

macOS:

bash

brew `install` cloudflare/cloudflare/cloudflared

Windows: Download from the [Cloudflare releases page](#)

Localized AI

Remote System Setup Steps

1. Authenticate with Cloudflare:

```
cloudflared tunnel login
```

This opens your browser to authenticate with your Cloudflare account.

2. cloudflared tunnel create ollama-tunnel

Add DNS record:

```
cloudflared tunnel route dns ollama-tunnel ollama.yourdomain.com
```

3. Run the tunnel:

```
cloudflared tunnel run ollama-tunnel
```

ET24Pro

- 24MP

ET Series

Professional Book Scanner

\$519.00 ~~\$649.00~~

Choose your scanner

ET MAX

Unprecedented Professional Book Scanner with HDMI

Featuring **38MP & 410 DPI**, the CZUR ET MAX delivers crystal-clear scans. **Sidelight & Laser Curve-Flatten Tech** remove glare and page curvature. Includes **OCR** for editable text. Works with **Windows, macOS & Linux**. Scan books in minutes.

ET24 Pro

Incomparable Professional Book Scanner with HDMI.

The CZUR ET24 pro featuring **24 Mp & 320 DPI**, it offers you the ultimate crystal-clear scanning quality. With the sidelight included, it greatly reduces the reflections when scanning glossy paper. It is compatible with Windows, macOS, and **LINUX**.

ET18 Pro

Advanced scanning with OCR, high-quality scan results.
